

Company Background

Profile

Founded in October 1999, HT Zone is an Internet-based company that provides technical expertise and solutions to various types of online marketing strategies and projects.

A website development and hosting company, it caters to the needs of organizations tapping on the reach of the Internet. HT Zone is able to identify the features and services needed by organizations to fully enhance their web presence to exploit the highly volatile market in the best manner possible.

HT Zone has helped various organizations tap into the information highway such as Ette Bright International Pte Ltd, Embassy of Israel – Singapore and Disaster Recovery Institute Asia.

HT Zone is an accredited test center under NCC Education for its Universal Internet Certification (UIC) program and a registered training provider with SDF EasyNet to provide UIC programs.

Team Member

Tan Hai Tat, Founder

Mr Tan graduated from National University of Singapore with B.Sc (Comp. & Info. Sc.) in year 2000. He was among the pioneering batch of Entrepreneurs that took part in the Technopreneur Home Office Scheme (THO) and was featured in Project Eyeball in Oct 2002. He was also the founder of Network Technoprise Pte Ltd and Lifelong Training Centre. He has also managed the “NetTech CareerGuide 2001” project, whereby 20000 CD-ROMs were distributed free to 80 over secondary schools/JCs. He has worked with People’s Association in conducting various IT talks at schools and Community Clubs/Centres.

Liew Shiang Chen, IT Analyst

Shiang Chen is involved in consultancy work using open-source software, Microsoft-based solutions, various networking and Web Service projects. He has experience with system administration on Internet servers running on Linux, Windows 2000/2003 and FreeBSD platforms.

Our Services

Website Development

Our main focus is in the creation of websites for organizations who are keen to go online. We believe in a professional approach by meeting up with our clients to find out what their requirements and creating a package that addresses their needs. Our packages start from \$250 onwards.

Web Hosting

With our Sun-Cobalt servers, we are able to provide reliable and affordable hosting packages to various organizations. Our most popular package is the 10MB web/email space with free domain name (.com/.net/org) at \$80 yearly only.

Co-location & Dedicated Server Hosting

For organizations that want more control of their servers, we provides co-location and dedicated server services to suit their needs. Our competitive prices start from \$100 monthly.

IT Training

HT Zone is accredited as a test center under NCC Education for its Universal Internet Certification (UIC) program and a registered training provider with SDF EasyNet to provide these programs. We conduct various fast-track workshop to help organizations to learn and adopt Internet applications in a hassle-free manner.

SMS/MMS solutions

HT Zone is a reseller of M2U Enterprise Edition, an application that includes a suite consisting of a MMS Composer, MMS/SMS Gateway, and GPRS Modem. It satisfies the needs of any organization that needs to broadcast SMS/MMS conveniently. You can view the details of this suite at <http://www.mozat.com/mozat/m2uee/overview.htm>

The New Internet Certification Program by NCC Education.

Universal Internet Certification (UIC) is a professional Internet qualification track providing a vendor independent syllabus leading to examinations which are authorized and administered by NCC Education.

UIC is a modern and versatile certification program that delivers the necessary skills required for careers in Web Programming, Web design and e-Business, whilst also providing an important opportunity for existing IT professionals to gain recognized certification and status in the Internet field. UIC is an easily accessible and flexible certification vehicle recognizing the student's ability at Associate, Specialist or Expert level.

Background of NCC Education

NCC Education is the world's leading independent IT testing and certification body. Its history spans 35 years in which time it has continually broken new ground. NCC Education offers a wide range of globally recognized leading-edge IT education and training programmes. With a network of over 300 Accredited Partners in over 40 countries and more than 200,000 people worldwide assessed annually, NCC Education is truly the Global IT Campus.

Program Material

The course materials are developed by HT Zone, specially customized to suit the needs and requirements of participants. The quality coursewares are developed by the in-house staff to ensure that students grasp the concepts easily. As HT Zone understands that different participants from different background and age groups have different needs, we are open to packaging our courses to suit the needs, requirements and specification of the participants while still delivering results.

Entry Requirements

There are no entry requirements. The program is suitable for anyone from a school leavers to a mature adult looking to change career, or as a route for existing IT professionals to gain recognized certification and status in the Internet field.

(this is the original version for NCC, how to modify make it more suitable to schools/students/teachers?)

Training Options

Training for the UIC program for those who wish to become an Associate, Specialist or Expert is available either by instructor-led classes or self-study. The examinations can be taken at HT Zone's test center : 1999, Toa Payoh Lor 8 Singapore 319258.

Program Structure and Content

The program is organized into three inter-related levels, which are sub-divided into three specialist fields or tracks: Web design, Web Programming and e-Business. For more details, refer to <http://www.uicprogram.com>

Assessment

The assessment is by online examination, administered by NCC Education in the UK. Students are awarded by a certificate upon passing each module; issued by HT Zone. When a student has passed the necessary exam(s) for a particular level, they become an Associate, Specialist or Expert in their chosen track.

The benefits of UIC

- NCC Education is an international company and its qualifications are recognized worldwide.
- A complete Internet Training solution with testing and certification
- A modern and versatile Internet certification track from beginner to expert level.
- The UIC syllabus provides an 'off the shelf' training solution suitable for individuals requiring specific Internet skills.
- Examinations are authorized and administered by NCC Education using online Automated Testing
- The UIC certification program provides greater differentiation and benefit when considering Internet training.
- NCC Education provides support to all training partners to ensure that students gain the maximum benefit from this program.

Customised Training Packages

Based on experience, HT Zone realizes that it is difficult to organize training events and expect that participants are able to attend and understand the training material because such a session will not be able to cater to the needs and requirements of the individual participants. Furthermore, participants attending such courses usually come to the training with differing expectations of what they would gain at the end of the day. This not only defeats the purpose of the training but also wastes the time, money and effort of all involved.

This is why we are willing to listen to your needs and create a customized "on-demand" package that is tailored to your particular needs and requirements. Some extra effort would obviously be required, but we know that the results would be well worth it. If you have something in mind that you would like to discuss with us, please contact Mr. Tan Hai Tat at 9009 7218 (H/P) or haitat@htzone.com.
